Frameworks/Libraries: ASP.NET Core, EF Core, React.js, PyTorch, SQLite

Tools: Git/GitHub, PowerShell, Postman, IBM Rational DOORS, MATLAB, Cursor

WORK EXPERIENCE

Lockheed Martin   **Orlando, FL**

Systems Engineering Intern   October 2024 – Present

- Develop product specifications by analyzing customer's initial design specifications, integrating sub-systems, and evaluating system architecture through testing and trade studies to satisfy customer requirements and program objectives.
- Collaborate with cross-functional teams to write, track, submit requirements and gain customer concurrence, raising total requirement concurrence to 80%+.

Orlando Health   **Orlando, FL**

Radiation Oncology IT Volunteer   June 2022 – August 2022

- Supported the administration team with the management of user access requests.
- Automated Active Directory group provisioning with PowerShell, reducing access request handling time by 15% and enhancing departmental productivity.

PROJECTS

Smart Expense Tracker   May 2025

- Developed a full-stack budgeting application using an ASP.NET MVC framework with a SQLite backend mapped with Entity Framework and a React-frontend.

Portfolio Website   March 2023

- Designed a responsive portfolio website using HTML, CSS, and JavaScript, showcasing technical projects, skills, and achievements to prospective employers and collaborators.

Relay   February 2023

- Built Relay, a versatile Python-based Discord chat bot with automated responses, data retrieval and logged user input utilizing asynchronous programming.
- Implemented a command interface for real-time API data fetching and access.
